Jaejun Brandon **Lee**

Research Scientist at Epson · Computer Vision · Natural Language Processing · Speech Recognition

(+1) 204-698-1771 | ljj7975@gmail.com | ljj7975 | ljj7975 | ljj7975.github.io

Introduction

As a research scientist at Epson's computer vision & robotics lab, I am dedicated to crafting intelligent 2D and 3D detection systems tailored specifically for non-expert users. I fully leverage large language models to enhance usability and interpretability while utilizing parameter-efficient fine-tuning techniques to streamline adaptation to changing environments. Drawing from my hands-on expertise in natural language processing, speech recognition, robotics, and computer vision, **I am passionate about developing human-like intelligence through multi-modal representation learning and efficient domain adaptation**.

Education

University of Waterloo
Waterloo, ON, Canada

Master of Mathematics in Computer Science, Advisor: Dr. Jimmy Lin — *2020*

- Thesis title: In-Browser Personalization for Ubiquitous Keyword Spotting
- Research area: Information retrieval and deep learning (natural language processing & speech recognition)

University of Waterloo
Toronto, ON, Canada

Bachelor of Computer Science — *2018*

- Completed co-operative program and graduated with distinction
- Recipient of President's Scholarship and Faculty of Mathematics Scholarship

Scholarships

2013-2018	**Scholarship**, Faculty of Mathematics Scholarship, University of Waterloo	*value of CAD 25,000*
2013	**Scholarship**, President's Scholarship, University of Waterloo	*value of CAD 2,000*
2013	**Scholarship**, Winnipeg North Rotary Club Scholarship	*value of CAD 5,000*
2013	**Scholarship**, Loblaw Scholarship	*value of CAD 1,500*

Experience

Research Scientist
Markham, ON, Canada

Epson Canada - Computer Vision & Robotics Lab — *Mar. 2023 - Present*

- Conducting research to develop a novel interpretable 2D object and attribute detection system designed for non-expert users.
  - Invented a two-stage adapter-based domain adaptation method that utilizes a contrastive loss focused on hard-negative samples.
  - Enabling effective verification of the model's representations by establishing a strong understanding of primitive concepts.
- Proposed and developed a prompt-based 2D keypoint detection pipeline that eliminates keypoint-specific training needs while remaining robust in multi-instance scenarios (a first-author paper under review for AAAI 2025)

Lead Research Scientist
Toronto, ON, Canada

Roboeye.ai — *Jul. 2021 - Mar. 2023*

- Developed a real-time (<1 sec) 6D pose estimation pipeline integrating latest computer vision techniques.
  - Point cloud reconstruction + instance segmentation (Mask R-CNN & DetectoRS) + pose estimation (FCGF-based RANSAC & PVN3D) + pose refinement (ICP) + detection filtering (3D NMS).
- Led a team of 20+ engineers in deploying and maintaining 50+ bin-picking systems for continuous operation without failure.

Research Scientist
Toronto, ON, Canada

Roboeye.ai — *Mar. 2020 - Jul. 2021*

- Implemented an intuitive vision-driven bin-picking solution leveraging a 6D pose estimation pipeline.
  - Fully automated online model training system using PyTorch, NVIDIA Isaac Sim, OpenCV, and AWS.
  - C++ application designed for bin-picking tasks using ROS, Qt5, Protobuf, OpenCV, and PCL.
  - Online object detection performance tracking system using AWS, Docker, W&B, Django.

Research Scientist
Remote

Mozilla - Emerging Technologies Team — *Mar. 2020 - Oct. 2020*

- Developed a wake-word detection system for Firefox, Howl, publishing a first-author paper at an EMNLP workshop [3].
- Integrated Howl with Firefox Voice to provide a completely hands-free experience to over 8,000 users.

Research Scientist Intern
Mountain View, CA, USA

Samsung Research America - Visual Display Intelligence Lab
Apr. 2019 - Aug. 2019

- Invented a novel co-clustering algorithm leveraging GANs, resulting in a first-author paper at ICME 2021 [2] and two patents [9, 10].
  - Proposed combining two modality-specific InfoGANs to maximize mutual information between the modalities, identifying unique clusters within dual-modal data that are challenging to detect from a single-modality perspective.
  - Integrated into a recommendation system that captures complex relationships between TV programs and viewers.

Graduate Student Researcher
Waterloo, ON, Canada

University of Waterloo - Data Systems Group
Sep. 2018 - Dec. 2019

- Honkling: Personalized Keyword Spotting System – two first-author papers at EMNLP 2019 [6] and IUI 2019 [8].
  - Implemented keyword spotting with convolutional neural networks in pure JavaScript that runs in any standards-compliant browser.
  - Applied fine-tuning based accent adaptation and studied its efficiency in the browser.
- Efficient Domain Adaptation of Language Models – two papers at ACL 2020 [4, 5].
  - Developed memory/latency efficient inference techniques and investigated the effects of freezing various layers for language models (BERT).

Undergraduate Research Assistant
Waterloo, ON, Canada

University of Waterloo
May. 2018 - Aug. 2018

- Studied the suitability of JavaScript as an environment for deep learning execution.

Software Engineer Intern
Menlo Park, CA, USA

Meta (Facebook) - Dynamic Ads Infrastructure
Jan. 2018 - Apr. 2018

- Applied KNN algorithms on product-level and user-level embeddings to enhance the quality of personalized advertisements.
- Redesigned the advertisements selection pipeline to retrieve user embeddings at an earlier stage, reducing loading time by 7%.

Undergraduate Research Assistant
Waterloo, ON, Canada

University of Waterloo
Sep. 2017 - Dec. 2017

- Implemented an RDD usage report generator for Spark and analyzed the impact of caching replacement policies on performance.

Undergraduate Research Assistant
Waterloo, ON, Canada

University of Waterloo
Sep. 2017 - Dec. 2017

- Analyzed latency and throughputs of Apache Storm and Spark Streaming; benchmarked against TPCx-IoT specifications.

Software Engineer Intern
Palo Alto, CA, USA

Uber - Complex Data Processing / Spark Team
May. 2017 - Aug. 2017

- Integrated TensorFlowOnSpark on Uber's infrastructure and evaluated its stability.
- Transformed MLlib pipeline into a Spark job with TensorFlow; reduced training time from 33 to 3 hours.

Software Engineer Intern
Toronto, ON, Canada

Zynga Inc - Central Technology Organization
Aug. 2016 - Dec. 2016

- Developed a new architecture for the internal search system.
  - Improved data integrity led to 30% increase in search usage (Amazon Elasticsearch, Amazon Kinesis Streams and Amazon SQS).

Software Engineer Intern
Waterloo, ON, Canada

SAP - Emerging Technologies Team
Jan. 2016 - Apr. 2016

- Designed and developed a distributed SQLA back-end system with support for the OData protocol.
- Integrated Robot framework, an automated testing tool, to reduce QA cycle from 3 days to 4 hours.

Software Engineer Intern
Toronto, ON, Canada

Mozzaz Corporation
May. 2017 - Aug. 2017

- Developed a cross-platform web application using Cordova and Angular.js; performed back-end development with C#.

Presentation

2024 American Medical Informatics Association (AMIA) Annual Symposium — *San Francisco, CA, USA*
Poster Presentation — *Nov., 2024*
- Analyzing YouTube Videos on Suicide-Related Thoughts and Behaviours: A Study Using Topic Modeling and Discourse Analysis.

2024 IHPME Research and Impact Day — *Toronto, ON, Canada*
Oral Presentation — *Apr., 2024*
- Analyzing YouTube Videos on Suicide-Related Thoughts and Behaviours: A Study Using Topic Modeling and Discourse Analysis.

Epson's Global Information Sharing Meeting — *Virtual*
Oral Presentation — *Apr., 2024*
- Advances in Large Vision and Language Models Driven by Prompt Engineering for Efficient Domain Adaptation.

2024 Annual Meeting of the Society for Digital Mental Health — *Virtual*
Poster Presentation — *Apr., 2024*
- Analyzing YouTube Videos on Suicide-Related Thoughts and Behaviours: A Study Using Topic Modeling and Discourse Analysis.

Epson's Canadian Information Sharing Meeting — *Markham, ON, Canada*
Oral Presentation — *Nov., 2023*
- Enhancing 2D Object Detection Efficiency through Prompt Engineering.

2nd Workshop for Natural Language Processing Open Source Software (NLP-OSS) — *Virtual*
Poster Presentation — *Nov., 2020*
- Howl: A Deployed, Open-Source Wake Word Detection System.

2019 Conference on Empirical Methods in Natural Language Processing (EMNLP) and 9th International Joint Conference on Natural Language Processing (IJCNLP) — *Hong Kong, China*
Poster Presentation — *Nov., 2019*
- Honkling: In-Browser Personalization for Ubiquitous Keyword Spotting.

24th International Conference on Intelligent User Interfaces (IUI) — *Los Angeles, CA, USA*
Poster Presentation — *Mar., 2019*
- Universal Voice-Enabled User Interfaces using JavaScript.

Professional Development

Teaching Assistantship

CS 452/652 – Real-time Programming — *Waterloo, ON, Canada*
University of Waterloo, Instructed by Prof. Bill Cowan — *Fall 2019*

CS 480/680 – Introduction to Machine Learning — *Waterloo, ON, Canada*
University of Waterloo, Instructed by Prof. Edith Law — *Winter 2019*

CS 451/651 – Data Intensive Distributed Computing — *Waterloo, ON, Canada*
University of Waterloo, Instructed by Prof. Jimmy Lin — *Fall 2018*
- Led weekly discussion sessions consisting of 10∼20 students and held office hours each week to assist those who needed additional support.
- Graded assignments and exams, and conducted exam preparation sessions.

Academic & Professional Mentorship

Allen Tao — *Markham, ON, Canada*

Research Intern — *May. 2024 - Present*

- Mentoring a research project on few-shot object and attribute detection.

Sandra Wang — *Markham, ON, Canada*

Research Intern — *Mar. 2023 - May. 2024*

- Mentored research projects on 3D scene understanding and few-shot keypoint detection (one paper under review for AAAI 2025).

Xinyu (Mavis) Liu — *Waterloo, ON, Canada*

Undergraduate Research Assistant — *Jan. 2018 - Aug. 2018*

- Mentored a research project on keyword spotting.
