Jaejun Brandon **Lee**

Research Scientist at Epson · Computer Vision · Natural Language Processing · Speech Recognition

(+1) 204-698-1771 | ljj7975@gmail.com | ljj7975 | ljj7975 | ljj7975.github.io

Introduction

As a research scientist at Epson's computer vision & robotics lab, I am dedicated to crafting intelligent 2D and 3D detection systems tailored specifically for non-expert users. I take full advantage of large language models to enrich usability and interpretability while leveraging parameter-efficient fine-tuning techniques to streamline domain adaptation. Drawing from my hands-on expertise in natural language processing, speech recognition, robotics, and computer vision, I am passionate about harnessing multimodality to enhance the interpretability of AI systems, making these systems more user-friendly.

Education

University of Waterloo *Waterloo, ON, Canada*

Master of Mathematics in Computer Science, Advisor: Dr. Jimmy Lin *2019*

- Thesis title: In-Browser Personalization for Ubiquitous Keyword Spotting
- Research area: Information retrieval and deep learning (natural language processing & speech recognition)

University of Waterloo *Toronto, ON, Canada*

Bachelor of Computer Science *2018*

- Completed co-operative program and graduated with distinction – GPA : 3.80 / 4.00
- Recipient of President's Scholarship and Faculty of Mathematics Scholarship

Scholarships

2013-2018	**Scholarship**, Faculty of Mathematics Scholarship, University of Waterloo	*value of CAD 25,000*
2013	**Scholarship**, President's Scholarship, University of Waterloo	*value of CAD 2,000*
2013	**Scholarship**, Winnipeg North Rotary Club Scholarship	*value of CAD 5,000*
2013	**Scholarship**, Loblaw Scholarship	*value of CAD 1,500*

Publications and Patents

* equal contribution

Presentation

2024 IHPME Research and Impact Day — *Toronto, ON, Canada*
Oral Presentation — *April, 2024*
- Analyzing YouTube Videos on Suicide-Related Thoughts and Behaviours: A Study Using Topic Modeling and Discourse Analysis.

Epson's Global Information Sharing Meeting — *Virtual*
Oral Presentation — *April, 2024*
- Advances in Large Vision and Language Models Driven by Prompt Engineering for Efficient Domain Adaptation.

2024 Annual Meeting of the Society for Digital Mental Health — *Virtual*
Poster Presentation — *April, 2024*
- Analyzing YouTube Videos on Suicide-Related Thoughts and Behaviours: A Study Using Topic Modeling and Discourse Analysis.

Epson's Canadian Information Sharing Meeting — *Markham, ON, Canada*
Oral Presentation — *Nov, 2023*
- Enhancing 2D Object Detection Efficiency through Prompt Engineering.

2nd Workshop for Natural Language Processing Open Source Software (NLP-OSS) — *Virtual*
Poster Presentation — *Nov, 2020*
- Howl: A Deployed, Open-Source Wake Word Detection System.

2019 Conference on Empirical Methods in Natural Language Processing (EMNLP) and 9th International Joint Conference on Natural Language Processing (IJCNLP) — *Hong Kong, China*
Poster Presentation — *Nov, 2019*
- Honkling: In-Browser Personalization for Ubiquitous Keyword Spotting.

24th International Conference on Intelligent User Interfaces (IUI) — *Los Angeles, CA, USA*
Poster Presentation — *Mar, 2019*
- Universal Voice-Enabled User Interfaces using JavaScript.

Professional Development

Teaching Assistantship

CS 452/652 – Real-time Programming — *Waterloo, ON, Canada*
University of Waterloo, Instructed by Prof. Bill Cowan — *Fall 2019*

CS 480/680 – Introduction to Machine Learning — *Waterloo, ON, Canada*
University of Waterloo, Instructed by Prof. Edith Law — *Winter 2019*

CS 451/651 – Data Intensive Distributed Computing — *Waterloo, ON, Canada*
University of Waterloo, Instructed by Prof. Jimmy Lin — *Fall 2018*
- Led weekly discussion sections consisting of 10∼20 students and held weekly office hours and help sessions.
- Facilitated exams, graded problem sets and exams, and held exam preparation sessions.

Academic Mentorship

Allen Tao — *Markham, ON, Canada*
Research Intern — *May. 2024 - Present*
- Mentoring a research project on few-shot object detection.

Sandra Wang — *Markham, ON, Canada*
Research Intern — *Mar. 2023 - May. 2024*
- Mentored research projects on 3D scene understanding and few-shot keypoint detection (one paper under review for ECCV 2024).

Xinyu (Mavis) Liu — *Waterloo, ON, Canada*
Undergraduate Research Assistant — *Jan. 2018 - Aug. 2018*
- Mentored an undergraduate research project on keyword spotting.

Experience

Research Scientist — *Markham, ON, Canada*
Epson Canada - Computer Vision & Robotics Lab — *Mar. 2023 - Present*
- Developing a customizable and interpretable 2D detection system for non-expert users by leveraging a large language model.
- Utilizing a novel open-set object segmentation method, developed a prompt-based keypoint detection pipeline that remains robust in multi-instance scenarios (one first-author paper under review for ECCV 2024).

Lead Research Scientist
Toronto, ON, Canada

ROBOEYE.AI
Jul. 2021 - Mar. 2023

- Developed a real-time (<1 sec) 6D pose estimation pipeline integrating latest computer vision techniques.
  - Point cloud reconstruction + instance segmentation (Mask R-CNN & DetectoRS) + pose estimation (FCGF-based RANSAC & PVN3D) + pose refinement (ICP) + detection filtering (3D NMS).
- Led a team of 20+ engineers in deploying and maintaining 50+ bin-picking systems for continuous operation without failure.

Research Scientist
Toronto, ON, Canada

ROBOEYE.AI
Mar. 2020 - Jul. 2021

- Developed an intuitive vision-driven bin-picking solution by leveraging a 6D pose estimation pipeline.
  - Fully automated online model training system using PyTorch, NVIDIA Isaac Sim, OpenCV, and AWS.
  - C++ application designed for bin-picking tasks using ROS, Qt5, Protobuf, OpenCV, and PCL.
  - Online object detection performance tracking system using AWS, Docker, W&B, Django.

Research Scientist
Remote

MOZILLA - EMERGING TECHNOLOGIES TEAM
Mar. 2020 - Oct. 2020

- Developed a wake-word detection system for Firefox, Howl, publishing a first-author paper at an EMNLP workshop [3].
- Integrated Howl with Firefox Voice to provide a completely hands-free experience to over 8,000 users.

Research Scientist
Mountain View, CA, USA

SAMSUNG RESEARCH AMERICA - VISUAL DISPLAY INTELLIGENCE LAB
Apr. 2019 - Mar. 2020

- Developed a novel co-clustering algorithm leveraging GANs, resulting in a first-author paper at ICME 2021 [2] and the filing of two related patents [9, 10].
  - Jointly learns disentangled representations of dual data dimensions and their underlying interrelation in the correlation space.
- Implemented user-centric TV program recommendation by analyzing watch history.

Graduate Student Researcher
Waterloo, ON, Canada

UNIVERSITY OF WATERLOO - DATA SYSTEMS GROUP
Sep. 2018 - Dec. 2019

- Personalized Keyword Spotting System – two first-author papers at EMNLP 2019 [6] and IUI 2019 [8].
  - Implemented keyword spotting with convolutional neural networks in pure JavaScript that runs in any standards-compliant browser.
  - Applied fine-tuning based accent adaptation and studied its efficiency in the browser.
- PEfficient Parameter Fine-Tuning of Large Language Models – two papers at ACL 2020 [4, 5].
  - Developed memory/latency reduction techniques and investigated the effects of freezing various layers for large language models (BERT).

Undergraduate Research Assistant
Waterloo, ON, Canada

UNIVERSITY OF WATERLOO
May. 2018 - Aug. 2018

- Studied the suitability of JavaScript as an environment for deep learning execution.

Software Engineer Intern
Menlo Park, CA, USA

META (FACEBOOK) - DYNAMIC ADS INFRASTRUCTURE
Jan. 2018 - Apr. 2018

- Applied KNN algorithms on product-level and user-level embeddings to enhance the quality of personalized advertisements.
- Redesigned the advertisements selection pipeline to retrieve user embeddings at an earlier stage, reducing loading time by 7%.

Undergraduate Research Assistant
Waterloo, ON, Canada

UNIVERSITY OF WATERLOO
Sep. 2017 - Dec. 2017

- Implemented an RDD usage report generator for Spark and analyzed the impact of caching replacement policies on performance.

Undergraduate Research Assistant
Waterloo, ON, Canada

UNIVERSITY OF WATERLOO
Sep. 2017 - Dec. 2017

- Analyzed latency and throughputs of Apache Storm and Spark Streaming; benchmarked against TPCx-IoT specifications.

Software Engineer Intern
Palo Alto, CA, USA

UBER - COMPLEX DATA PROCESSING / SPARK TEAM
May. 2017 - Aug. 2017

- Integrated TensorFlowOnSpark on Uber infrastructure and evaluated its stability.
- Transformed MLlib pipeline into a Spark job with TensorFlow; reduced training time from 33 to 3 hours.

Software Engineer Intern
Toronto, ON, Canada

ZYNGA INC - CENTRAL TECHNOLOGY ORGANIZATION
Aug. 2016 - Dec. 2016

- Developed a new architecture for the internal search system.
  - Improved data integrity led to 30% increase in search usage (Amazon Elasticsearch, Amazon Kinesis Streams and Amazon SQS).

Software Engineer Intern
Waterloo, ON, Canada

SAP - EMERGING TECHNOLOGIES TEAM
Jan. 2016 - Apr. 2016

- Designed and developed a distributed SQLA back-end system with support for the OData protocol.
- Integrated Robot framework, an automated testing tool, to reduce QA cycle from 3 days to 4 hours.

Software Engineer Intern
Toronto, ON, Canada

MOZZAZ CORPORATION
May. 2017 - Aug. 2017

- Developed a cross-platform web application using Cordova and Angular.js; performed back-end development with C#.
